

GOLDEN ENVIRO ORGANIC FLUID SOLIDIFIER

Technical Data Sheet

ORGANIC FLUID SOLIDIFIER is a product that will not only solidify all organic and body fluid material but also is treated with THYME OIL and is Generally consider safe (G.R.A.S.) by the USA Food and Drug Administration.

How can it work and not be toxic

First by using a very effect solidifier we capture and encapsulate the organic and body fluids, we boost the solidifier power and encapsulation power by adding a work horse, being a super absorbent polymer (SAP) that captures remaining liquids.

Then the product is treated with our special THYME OIL to eliminate offensive odors and assist in the spreading of germs.

The final ingredient is a mineral oil used to ensure the solidifier is dust free.

Ready to Use

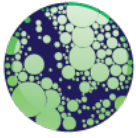

Consistent efficacy performance every time

Eliminate complex dilution instructions

Control portions

Consistent health and safety profile

The sensible choice for employees and clients

Health and Safety

In choosing a THYME OIL, we wanted to be sure the product we used did not contain, fragrances, dyes, ammonia or chlorine. The oil is made from pure renewable plant extract ingredients.
